# Embed Video

Within Office 365, it is possible to place videos (embed) in-line and in-context where people work on projects, online and on-premises. You can do this within SharePoint Team Sites, custom company portals, internal blogs, wikis and more. Using the Office 365 Video solution, it is as simple as copy, paste and publish.

<https://blogs.office.com/2016/01/19/embed-video-throughout-your-intranet/>

# Planner is in First Release

## Recognize your peers by giving Praise

With the new Praise feature in Delve, you are now able to send publicly viewable praise to your colleagues. In addition, an email is sent to their manager to make them aware of the individual's efforts. The praise appears in Delve on the recipient's profile, and colleagues can click **Like** to increase the recognition.

## Collect content by adding to Favorites

"Now that'll be useful," you say to yourself. "I'll want to save that for later." In comes Favorites, a new way within Delve to easily save information you want to come back to later. When you see something in your activity feed that piques your interest, you can hover over the card and click the star in the upper-right corner. When you want to get back to your favorites, you can visit the new Favorites tab in your ME view in the left-hand navigation. Once you've read or shared it, it's just as easy to remove the item from your Favorites tab.

Both features are rolling out into Office 365 First Release customers in the U.S. starting 10.1.15

# Ink on Macs

Today we are releasing new inking tools in Office for iPad and iPad Pro to make it easy to use your finger or Apple Pencil to work on documents, presentations, spreadsheets and notes.
