Teams Evolution Part 2

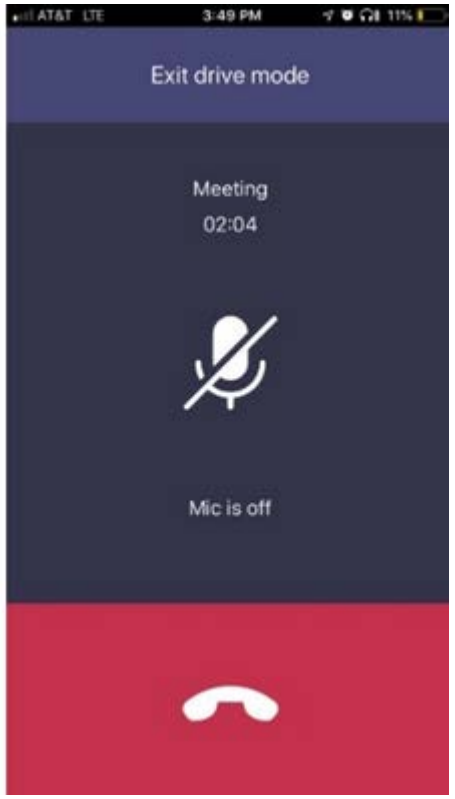
with Mike Dixon

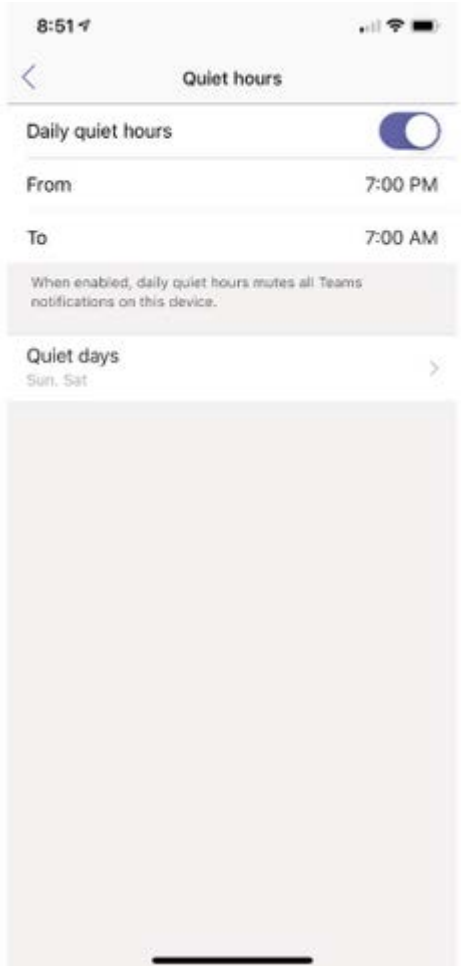
Office 365 Updates

Since last time

Teams mobile app – New features

- **Safer meetings on the go with Drive Mode**
- **Keep your work-life balance with quiet hours**
- **Know who is calling you via Microsoft Teams**
- **See organizational information from anywhere**
- **Schedule meeting on the go**





https://techcommunity.microsoft.com/t5/Microsoft-Teams-Blog/What-s-new-in-Microsoft-Teams-November-round-up/ba-p/284335

Org-wide Teams

Org-wide teams provides an automatic way for everyone in an organization with no more than 1,000 users to be a part of a single team for collaboration. Global administrators can now easily create a public team that adds every user in the organization and automatically keeps the membership up to date with Active Directory as users join and leave the organization.

- Max users: 1,000
- All Global admins become owners by default
- Guests can be added

Transform Word

Transform to Web: Convert Word documents into beautiful web pages

Transform to Web turns your Word document into a beautiful, interactive, and easy-to-share Sway web page that looks great on any device. Simply author your document, on your own or in collaboration with others, in Word. To transform the document, click File, then Transform. You'll have a variety of styles to select, from more professional to more casual. Select the one you want and hit Transform. A beautiful Sway web page will be created that you can then share with others.

HITRUST & NIST Certified

Office 365 has earned HITRUST Certification from the Health Information Trust Alliance, the widely adopted security and risk management framework in the U.S. healthcare industry. This also includes the National Institute of Standards and Technology, or NIST, Cybersecurity Framework certification. The HITRUST Common Security Framework (CSF) helps health organizations address security, privacy and regulatory compliance through a comprehensive, flexible, framework of both prescriptive and scalable security controls.
